

Aurelia Executive Future Night 2026

Nov 12, 2026 17:30 - 21:30 • Báňa Budapest, Fővám tér 11–12., 1093 Budapest, Hungary

Active

Event token: 8HTHY9CE

Event name

Aurelia Executive Future Night 2026

Sender name in email (optional)

Aurelia Digital Europe

This name appears as the sender in invite emails (e.g. "Road to the Future 2055"). If you leave it empty, the event name will be used. It does **not** affect deliverability-only how it looks.

Reply-to email (optional)

daniel.cser@qrgate.org

We set this address in the invite email's Reply-To field. If someone replies to the invite, the message will be sent to this email address.

Date

11/12/2026

Start time

05:30 PM

Doors open (optional)

05:00 PM

End time (optional)

09:30 PM

Venue (optional)

Báňa Budapest, Fővám tér 11–12., 1093 Budapest, Hungary

Dress code (optional)

Business Elegant

Description (optional)

Aurelia Executive Future Night 2026 is an exclusive, invitation-only business evening bringing together senior executives, innovation leaders and digital decision-makers for an inspiring evening in Budapest.

The event focuses on AI-powered business operations, the future of customer experience and next-generation digital services.

Following a series of short keynote sessions, guests are invited to enjoy informal networking, premium catering and an evening lounge programme at one of Budapest's most distinctive Danube-side venues.

Event logo (optional)

Upload

Remove

Allowed: JPG/PNG/WebP, max 4 MB. On upload, we fit to max 600 px width, keeping aspect ratio (no upscaling).

Approach information (optional) - block heading

Arrival & Venue Information

The block appears when a description, image or map link is provided. The heading is shown only when completed.

Short directions (optional)

Guests will be welcomed at the QRGATE check-in point located at the main entrance of Báňa Budapest.

Image (optional)

Upload

Remove

Allowed formats: JPG/PNG/WebP, max. 4 MB. Images are resized to a maximum width of 900 px while keeping their proportions.

Map link (optional)

https://maps.app.goo.gl/mayBLEcw83ruxNnG7

When provided, an "Open map" link will appear for guests.

RSVP

RSVP records the Guest's response to the Invitation. It remains separate from actual Check-in activity.

RSVP disabled

Guests receive the Invitation and QR Ticket, but the Invitation does not ask them to confirm whether they plan to attend.

RSVP enabled

Guests can respond with Attending or Not attending. Until they respond, their RSVP remains Pending. RSVP does not replace Check-in.

Invitation frame language

The local language of this site is selected by default. English is used as the fallback when no local option is available.

English - Recommended for Solomon Islands

This is currently the only available invitation frame language for this site.

What does the invitation frame language control?

It controls QRGATE-generated text around the Event content, including labels, buttons, response options and ticket-related instructions.

The Event name, description, venue, dress code and other text entered by you are displayed exactly as entered. QRGATE does not translate those texts automatically.

This setting applies to Invitations sent after the change. Invitations already delivered are not rewritten.

Tip: send yourself a test invitation before inviting your guests

After saving the event details, test the complete invitation before sending it to your guests.

- Open the "Edit guest list" and add yourself to the guest list. You can enter your details manually or include yourself in the XLS import.
- Find your own row in the guest list.
- In the Actions column, click the Send invitation button to send the invitation only to yourself.

You can resend the individual invitation as many times as needed. Continue testing until the email, wording, images and event information look exactly the way you want. Once everything is ready, send the final invitations to your guests **individually** or **in bulk**.

Event Registration

Active

Allow people to register for this Event through a public Registration Page. Registrations remain separate from the Guest List until you review them and add selected registrations as Guests.

1

Collect registrations

Use a professional public Registration Page for this Event.

2

Review submissions

Incoming registrations stay in a separate Registration list for organizer review.

3

Add selected Guests

Add selected registrations to the Guest List, then continue with Invitations, RSVP, QR Tickets and Check-in.

Enable Event Registration

Enable the public Registration workflow for this Event. You remain in control of who is added to the Guest List.

Registration setup

Configure the public Registration Page, fields, availability and manage incoming registrations.

Set up registration

Share your Registration Page

Use the public link, QR code or website button to make registration available to participants.

Prepare check-in before event day

Important

A short check before the event helps avoid camera, browser or network surprises at the entrance.

1

Test before the event

Run a real scan test on the phones and browsers that will be used for check-in, preferably one or more days before the event. Before the event date, test scans do not count as actual guest entry.

2

Use real guest QR codes

Open the badge PDF to get real guest QR codes and test the full scanning flow exactly as it will work at the entrance.

Open all badges

3

If scanning is slow, switch camera

On some multi-camera phones, especially iPhone, the Ultra Wide / 0.5x camera can read QR codes poorly at close range. Switch to the normal main rear camera - recognition is usually much faster.

Do not test with real guest tickets on event day

From the event date, a successful guest scan is recorded as a real check-in. Complete testing beforehand so the check-in team can start immediately with live guests.

GUEST LIST

15

Guests

19

Entry capacity

A Guest is one Guest List record. Entry capacity is the number of people those Guest records may admit.
